## **EXAMINER'S AMENDMENT**

### ***Election/Restrictions***

Claim 1 is allowable. The restriction requirement for species 1-3, sub species 1a-1f, as set forth in the Office action mailed on 17 November 2005, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). Claims 6 and 7, directed to species 1e and species 1f no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. Claims 6 and 7, previously withdrawn, are hereby rejoined.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The primary reasons for allowance for claims 1, 4, and 6-9 is that applicant's claimed invention includes a heating device within an integrated circuit having an entire first side of the third resistive region being in physical and electrical contact with the first resistive region

and an entire second side of the third resistive region being in physical and electrical contact with the second resistive region. It is this limitation, expressed in the claimed combination not found, taught, or suggested in the prior art that makes these claims allowable over the prior art.

United states patent number 4,847,630 to Bhaskar et al. teaches an integrated thermal inkjet printhead (Figure 5B) and associated manufacturing process wherein the inkjet printhead thus produced has a longer lifetime relative to currently available printheads. However, Bhaskar et al. fails to teach a heating device within an integrated circuit having an entire first side of the third resistive region being in physical and electrical contact with the first resistive region and an entire second side of the third resistive region being in physical and electrical contact with the second resistive region.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
